

CV

Dr. Radmila Glišić

Dr. Radmila Glišić was born on February 11, 1963, in Kragujevac, where she finished elementary school and secondary school. She graduated in 1986, at the Faculty of Science in Kragujevac, in the Biology study group, with an average grade of 9.23 and defended the diploma thesis entitled: "Induction of callus from tubers, nodes and internodes of potato (*Solanum tuberosum* L.) variety Desire in culture *in vitro*" with a grade of 10.00. As a student, she was the winner of university awards for the results achieved during her studies. During the school year 1987/88, she worked as a biology professor in two secondary education centers in Kragujevac.

Since 1989, she has been working as an assistant-trainee for the group of zoological subjects, at the Institute of Biology of the Faculty of Science in Kragujevac. In 1993, she graduated at the Faculty of Biology in Belgrade, with an average grade of 9.75 and defended her master's thesis in the field of Cytology and histology under the title: "Stereological and ultrastructural analysis of the endocrine pancreas of Wistar rats in experimental chronic alcoholism". The following year, in 1994, she was selected as an assistant at the Institute of Biology of the Faculty of Science in Kragujevac. She defended her doctoral dissertation in 2003 at the Faculty of Biology in Belgrade, under the title: "Morphological and functional characteristics of the enteroinsular axis in an experimental model of *diabetes mellitus*, independent of insulin". In 2004, she was elected to the position of assistant professor in the field of Developmental Biology at the Institute of Biology of the Faculty of Science in Kragujevac, and in 2019 to the position of associate professor in the field of Cell and Tissue Biology.

Dr. Radmila Glišić has many years of teaching experience, gained through practical classes (Cytology, Plant Physiology, Systematics and Comparative Morphology of Invertebrates, Molecular Biology, Biology and Human Genetics for students of medicine, Pedology, Animal cytology, histology and embryology, Laboratory course in Cytology and Histology) and theoretical classes in a large number of subjects (Cytology, Cell Biology, Biology on the Internet, Bioethics, Experiments in biology classes and Manipulation of cells and tissues). At the state university in Novi Pazar, in academic year 2007/08, she taught as a guest teacher.

Dr. Radmila Glišić has published over 100 scientific papers, 16 of them in journals from the SCI list. He is the author of a university practicum of Cell biology and handbook of Histology. She participated in about 60 international and domestic conferences. As a researcher, she was involved in two projects of the Ministry of Science and Technology, one international Tempus project and more of local importance, and now she participates as researcher in one Junior project at the Faculty of Medicine and one project financed by The Science Fund of the Republic of Serbia. He is a member of the Serbian Society of Microscopy and the European Microscopy Society.

She was the mentor of 40 graduate theses and about 20 master's theses, as well as a member of numerous commissions for defense of master thesis. She has received numerous diplomas for the best rated teacher based on a student survey in a long series of years since 2007. She participated in many commissions for the selection of teachers and associates. To popularize science and raise the reputation of Faculty of Science in Kragujevac, she participated in numerous events. She took an active part in the work of various organs and bodies of the faculty.
