Job-related skills

Tijana Maksimović is engaged in research work in the field of Analytical Chemistry. The subject of her research is the practical application of non-doped and doped phosphate-tungsten bronzes for the determination of analyte concentration, as well as their potential catalytic, anti-radical activity, and antioxidant activity. She is involved in conducting exercises for the courses Separation Methods and Chemistry of Natural and Wastewaters. She actively participates in promoting the Faculty of Science through involvement in Science Festivals, scientific performances, and humanitarian actions, along with her fellow young researchers.

Since 2023, she has been a member of the Serbian Chemical Society branch in Kragujevac. During the 2022/2023 academic year, Tijana mentored a research project titled "What Determines the Color of Fireworks," guiding two students: Antonina Nikolić, an 8th-grade student from "Dragiša Luković Španac" Elementary School, and Nemanja Živanović, a 7th-grade student from "Milutin and Draginja Todorović" Elementary School, who are participants in the Talent Center that operates within the Education Center of the City of Kragujevac. At the National Competition for Talented Students of Primary and Secondary Schools 2023, held at the "Zemun" Technical School in Belgrade on May 27, 2023, Antonina Nikolić won 2nd place and a Special Award for Research Work - 1st place.
